

19 August 2019

## Circular to Growers

A few weeks ago we had an 11kV electrical breaker in the cogen failed. We have had a new breaker built and are now ready to reinstall it so we can restart the 38MW cogen.

Racecourse mill will cease crushing at 5 a.m. Wednesday 21 August to reinstall the 38MW switchboard. Crushing will resume at Racecourse at 5.00 p.m. on Thursday 22 August 2019.

Allotments will be reduced for Racecourse groups on Tuesday 20 August with the percentage dependent on crushing performance in the lead up to the stop. There will be no loading on Wednesday 21 August and a reduced allotment on Thursday 22 August with no early loading. Allotment percentages will be confirmed for Thursday.

Cane Supply staff will also confirm if any groups will be transferred to other mill areas.
